Understanding the illustrations:

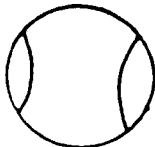

1. All drawings are actual size showing length, width, and height in one illustration.
2. The inside lines indicate a side view of all sides of the crystal shape.
3. Shading (black or diagonal lines) indicate a wall thickness.
4. A straight line perpendicular to a second line within the drawing indicates a flat top.
5. A curved line within the drawing indicates a curvature of that side.
6. A 45 degree angle at the end of a straight line indicates a beveled edge.
7. A curved line at the end of a straight line indicates a dropped end.
8. Two parallel lines in center of drawing indicates flat top and flat bottom.
9. No drawing within shape indicates a regular crystal.
10. No shading within shape indicates a planex crystal.
11. Dotted lines indicate a military crystal.
